

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-7 (Canceled).

Claim 8 (Previously Presented): A snow board with a divided gliding surface, comprising:

a basic body consisting of two gliding members and an elongate web provided between the gliding members, lateral slots being provided between the gliding members and the elongate web, and transition sites between the elongate web and forward and rear sections of the basic body, said transition sites being curved.

Claim 9 (Previously Presented): The snow board of claim 8, wherein the elongate web is structured as a support surface for a snow boarder and the slots between the gliding members and the elongate web have a height of up to 5 cm.

Claim 10 (Currently Amended): The snow board of claim \pm 8, wherein the gliding members have a waistline extending in a longitudinal direction, and spacers ~~being fixed or movable and releasably~~ arranged on surfaces of the gliding members.

Claim 11 (Currently Amended): The snow board of claim \pm 8, wherein spacers are releasably connected with the gliding members ~~by an insert~~.

Claim 12 (Previously Presented): A snow board, comprising:
an elongated unitary body of predetermined length forming first and second gliding members extending along opposite lateral margins thereof;

an elongate web extending between the first and second gliding members and being joined to forward and rear sections of the body in a curved transition and separated from the first and second gliding members by lateral slots.

Claim 13 (Previously Presented): The snow board of claim 12, wherein the elongate web protrudes from the surface of the body by from 3 to 5 cm.

Claim 14 (Previously Presented): The snow board of claim 12, wherein the first and second gliding members have elongated lateral margins of concavely curved configuration.

Claim 15 (Previously Presented): The snow board of claim 13, wherein the elongate web is provided with means for connecting bindings.

Claim 16 (Previously Presented): The snow board of claim 15, wherein the means for connecting bindings comprises inserts.

Claim 17 (Canceled).

Claim 18 (Previously Presented): The snow board of claim 15, further comprising spacers of a height substantially equal to a protrusion of the elongate web and attached to one of the gliding members and the bindings.
